## WEEKLY WEATHER.

The following are the extremes of temperature during the week ending Thursday night:

DATE.	Max.	Min.
Tuesday, Jan. 3.	57.0	44.0
Wednesday, " 4.	55.3	31.3
Thursday, " 5.	58.0	31.0

A. T. COLEMAN, Observer.

## THE VIRTUES OF A MULE.

The mule is very rarely sick—not near so often sick as the horse. Its hoofs are much sounder. It is not so apt to be injured, not being so easily frightened. It will do the same amount of good required by the horse. It will eat coarser food. When properly bred and handled it is full as trustworthy and industrious as the horse, and more docile. It will endure heat, better, and I have never been able to perceive that it did not endure cold as well, though the notion that it cannot is general. But there is no good reason why it should not endure the weather where its work will be found, the temperature is fully as low as in our northern states, and they last longer than do our horses.—Country Gentleman.

## THE VIRTUES OF A MULE.

After the moral and religious education of the family, we know of nothing that will confer a more lasting permanent benefit than that most instructive and, at the same time, entertaining periodical, the Scientific American. It should be a visitor in every household, and its work will be found to be idle. It is of special value to the machinist, the engineer, and the mechanic, but it is of equal value to the farmer and mercantile community, and to all who are of an inventive or ingenious turn of mind. It will be found invaluable to those, whether young or old, who are fond of using tools as a recreation. The subscription price is only \$1.00 for four months, or \$3.00 a year. The publishers are the old-established house of Mun & Co., 361 Broadway, N. Y.

## THE VIRTUES OF A MULE.

Another risk strike is reported in the Noon district, near Nogales. The Herald says:

Andy Courtney, the Noon camp stage man, who came in last evening reports an immense strike that has just been made in that camp. Billy Beck is the luckiest man in the district, as he has three miles west of the St. Patrick. The ledge is tremendously large and the ore assays 22.94 ounces of silver to the ton—about two-thirds silver. It is the biggest strike yet made in that remarkably rich camp, and there is considerable excitement. (The mine is owned by the "Lucky Star" and is situated on the surface of new imported waste.

## THE VIRTUES OF A MULE.

At a point in New Mexico, about 100 miles north of El Paso, there is a lake of molten, black volcanic glass, which seems to have been ejected at the moment of cooling into the lava waves of fantastic shapes. These lava waves or ridges are from ten to twelve feet high, with combing crests. This lava flow is about forty miles long from northeast to southwest, and from one to ten miles wide. For miles on all sides the lava is a perfect desolate that can be imagined. It consists of fine white ashes to any depth which so far, has been dug down.

## THE VIRTUES OF A MULE.

The land barons of the early days of Tucson are all now dead. J. S. Clark, who did more to develop the Tombstone than all other causes combined, is now in a hospital at Washington, and cannot long survive. Edward Field, the owner of the "Gilded Age," which brought so much work to Tombstone property owners, is cooking in a San Francisco restaurant. Thus the Duke of the Gilded Age and the Monarch of the Mountain Maid languish in poverty and obscurity.—Phoenix Gazette.

## THE VIRTUES OF A MULE.

Mr. J. Chapman, of the Casa Grande lumber yards, is making one of his annual visits to this section to look after his interests. Mr. Chapman is a very extensive dealer in lumber and timber and gives special attention to supplying mining timber, possessing unrivaled facilities in that line.

## THE VIRTUES OF A MULE.

Mr. J. B. Nugent came down from Pinal Thursday with a load of passengers. Mr. Nugent is one of the few who will stand by Pinal in its hour of adversity, having full faith in the ultimate prosperity of the place.

## THE VIRTUES OF A MULE.

Mr. James P. McLaughlin and Miss Eva L. Mayhew of Casa Grande, were married Monday afternoon by Rev. H. Hammond Cole, at the residence, and departed last night for a month's travel in California.—Citizen.

## THE VIRTUES OF A MULE.

Mr. R. H. Martin's ponds are full of carp, some of them being more than two feet in length. He will procure a seine and then fresh fish will become a staple product of the town.

## THE VIRTUES OF A MULE.

Hank Frost, on American, was shot and instantly killed at Nogales on Tuesday morning 30th by a Mexican gambler named Tajo, who escaped into Sonora.

## THE VIRTUES OF A MULE.

Ninety acres of cultivated land with unfading water right, one-half mile west of Florence, for sale. For further particulars apply at this office.

## THE VIRTUES OF A MULE.

Mr. A. S. Donan, representing Messrs. L. Zeckendorf & Co., of Tucson, arrived yesterday to interview the business men of Pinal county.

## THE VIRTUES OF A MULE.

Office Rooms to Let.  
 Two good rooms suitable for office use, to rent, in the Collingwood building. Apply at the store of W. C. Smith & Co.

## THE VIRTUES OF A MULE.

A preliminary survey has been made for a road to leave the Southern Pacific at Adonde, Arizona, about thirty miles east of Yuma, and pass up the Gila river to Texas Hill. From there the survey is to be continued into Phoenix.—Los Angeles Herald.

## THE VIRTUES OF A MULE.

Dr. T. H. Sabin was up from Casa Grande, on a short visit this week.

## THE VIRTUES OF A MULE.

Mr. M. E. Hammond, of Silver King, visited Florence this week.

# SILVER KING NOTES.

NOTICE.  
 DECEMBER 26, 1888.

After this date the force employed in the Silver King Mine will be reduced. All employees at the mine will be paid for the month of December including 25th, at 4 p. m., December 27th. The men to be retained will be notified, preference being given to employees having property with families residing in Silver King. R. ADAMS, Supt.

The above notice was posted on the afternoon of the 26th and caused a feeling of gloom to settle over the camp which was still further intensified when it became known that the wages of those retained had been reduced 50 cents per day. The order was issued in compliance with telegraphic orders from the headquarters in San Francisco and the force was cut down to 22 working men. The street of Silver King that once resounded with the voices and steady tread of many men, is to-day comparatively silent and no one knows what the future may show.

Christmas day was generally celebrated in Silver King, there being no men at work in the mine. The hotels and restaurants all served splendid repasts, having property supply of egg, hog and cigar contributed to the general enjoyment. In the evening there was a dance in the lower part of the Odd Fellows hall which was so generally attended that a list of those present would be a directory of Silver King. Many were present from Pinal and all unite in saying that it was the most enjoyable affair that has been held in Silver King for years. This success was due, no doubt, to the persistent and able committees in charge.

After the posting of the order relieving so many men, there came a general exodus, but those who were forced through business arrangements to remain a few days longer devoted their spare time to the enjoyments of the season, and dances were the order of the day. A dance was held at the hall on Friday evening which was in the nature of a farewell party and was attended by all sorts of men, who, Sunday evening Mrs. M. O'Boyle gave a party to her friends, which was generally enjoyed by those present.

The following bill of fare was actually presented to the guests of a certain establishment here a few days ago—  
 Soup, — Shadow, de aqua.  
 Quail, — (on the bush).  
 Beef, — boiled (straight).  
 Stale Bread, — (chased butter).  
 Spuds, — gone.  
 Sauter Kraut, — (on the side).  
 Pie, — (tomorrow).  
 Wind Pudding.

There are some who are inclined to believe that the King mine is "played out," that the prestige and glory of this most wonderful mine has departed. Taking the judgment and opinions of experienced mining men into consideration, there may have been some errors committed in the manner of working the mine, but reasonable men will suspend final judgment until such a time as a complete exploration and prospecting of the mine will demonstrate beyond a doubt that the ore body is lost or worked out. The portion of the mine heretofore prospected and developed is practically worked out, the ore body yet to be worked being very small indeed.

With the exodus of men from Silver King must necessarily end my duties as correspondent from Silver King for THE ENTERPRISE. To THE ENTERPRISE and its friends allow me to wish prosperity and success unbounded and to trust that our friendly relations may continue in whatever form I may cast my lot. To Silver King I can let me say "Requiescat in Pace." To its people "Vale."

## THE VIRTUES OF A MULE.

H. A. CHAPLIN.

## THE VIRTUES OF A MULE.

The following are among the recent arrivals at the Florence Hotel:

E. W. Childs, Aravaipa; W. J. Sol-leck, Dudleyville; John Bouta, De-noon; Geo. Labram and fam., Pinal; James Lewis, Wichita; Thos. Davis, San Francisco; Alfred Trippel, Yuma; S. M. Bailey, Casa Grande; P. R. Young, Phoenix; Odell, Dudleyville; A. G. Williams, Pinal; Geo. Atkinson, Oakland; D. C. Sellick, Dudleyville; Dr. T. H. Sabin, Casa Grande; Frank Shields, Dudleyville; J. ## THE VIRTUES OF A MULE.

While doing assessment work on some mines in Box Canyon, above the Butte, Mr. Thos. Farrell discovered a mill site that promises to become a splendid mine. The ledge lies between lime and syenite, is wide and extends the full length of the claim, with the ore in quartzite. Some of the ore encountered runs sixty percent in copper and from thirty to two hundred ounces in silver per ton. Mr. Farrell needs assistance in the development of the property and will give a good return for it.

## THE VIRTUES OF A MULE.

WOMAN'S WEAR.

A pretty finish for silk house gowns is the puff a la Queen Bee about the open neck, with the lace (on the bush).

Brown hair of all sorts is in high favor, but for use upon cloth wraps of blue or red or green or yellow brown, black is most often chosen, and is much better style.

The sun, the moon, the stars, even now and then, (on the bush) are worn upon the richest cloth, despite themselves over the surface of new imported waltzcoats.

Braiding grows more and more the rage for jackets, mantles and gowns, all of which should be accompanied by a braided band upon the richest cloth, despite themselves over the surface of new imported waltzcoats.

The real don't birds upon hats and bonnets are bad enough for anything, but what shall we say to that forsaken creature who has come to the "dust" and "dust" of waltzcoats and set them upon her heads and hats.

The creamy tinsel frock for wearing about the sleeves and open necks of house gowns are as artistic as they are useful, and far and away better taste and style than the flaring gilt fabric that some milliners so affect.

The silk foundation skirt must be some shades darker than the wool that drapes it, and is prettily finished with a wide plaiting, three inches deep, above which just comes a pinked and fully gathered frill of the same depth.

Now that the 5 o'clock tea is again raging, it is perhaps worth while to note that the correct cloths are rectangular in shape, and hang about the table in all manner of points that delight the eye in search of new effects.

The soft drapery, light weight woollens now so cheaply sold in the shops, make charming lace gowns by the addition of yoke collar, cuffs, belt or giraffe of velvet in some harmonious hue, and edged or outlined with rings or figure 8's in fine gold cord.

The soft, dull, porcelain blue that is like a sky under spring clouds is a favorite for a bride's walking and afternoon gown, and next it ranks the pure pearl and smoke grays that are made up with so much of silver embroidery as to recall a November frost.

Real turbans have round, soft crowns, higher than were worn last winter, and folded and wrinkled quite after the manner of felt or velvet, and are finished with a border of leaves, or of Persian lamb, which should exactly match the combination of the jacket.

Among choice outer cloaks come circulars of rich silk, lined throughout with white crumpled mandarin lamb, which is also used into coats, with capes and muffs, for the very young women—aged 2 or thereabouts—who have just begun to explore Adonis gardens.

For will be seen on very many of the most stylish house gowns the white and the low dandy of sable on white satin is like to be largely copied this side the water, though the delicate and beaver will be chosen by those whose purses do not admit a limited expenditure.

Shun as you would the plague the costly new feather fringe that your milliner will doubtless seek to beguile you into letting her run your gown or wrap, for time is money, and a fringe of shreds and patches, and, worse still, the debris of it will cling to and ruin all your other garments.

Fans of flowered gauze ribbon, woven in and out over very slender sticks, are the proper things to carry with the evening gown a la Josephine—the ribbon, by the way, should be of some thin stuff, gauze muslin, net or cambric, if the wearer would be strictly and rigidly correct in costume.

The new embroidery stuff, oriental canvas, is all wool if not a yard wide, and comes only in the most delicate faded tints, so that care is requisite in the choice of silk and wools to wear it, as one prominent shade will kill the whole outfit and make what ought to be a thing of beauty a delusion and a snare.

The combination of velvet and cloth is now accounted wonderfully fetching, and it is quite the latest vogue to have velvet, which in your cloth coat, or to wear gauze composed of velvet skirt, velvet jacket, or else have the jacket fronts velvet and backs cloth, or your velvet sleeves and long cloth draperies.—New York Commercial Advertiser.
